

Go-Kits - Antenna Supplies

There are many items which experience has proven are necessary for successful operations under stressful emergency situations. The better prepared the Operator is, the greater the chance of being able to convey, accurately, the messages and information dispatched. The Amateur Radio Emergency Service Official Emergency Station Operator may wish to include items needed to master the skill of rapid deployment and use of emergency antennas in the "Go-Kit:"

- Antenna Wire
- Stranded Coax
- Twin lead
- Clip-on Feed line Connector
- Extra Coax, 50 feet
- Barrel Connectors
- Miscellaneous Connectors
- Adapters
- Ground Rod
- Grounding Strap
